## ANSWER:

We went down to one track for a couple of reasons. It allows us to pull the one track slightly away from the edge of the trail and still give enough room for the skate track. It also gives a larger skate area which has been positively received from the skate skiers. It also allows a spot for maintenance runs with the snowmobile and Piston Bullie without wrecking a track. And lastly it was an experiment as a potential lane for multi-sport activities like snowshoeing and biking.

The grooming team will discuss putting in two tracks for some of the two way trails such as the main, Cedar, Stride and Glide, and Scampering Squirrel. Grooming for the upcoming Teck Race (February 3<sup>rd</sup>) will create two lanes on a few trails as it is a classic technique race.
